**Dear Sir/Ma'am**

This is our official response to the request sent to our office on October 18, 2022. The IP address in question is a TOR exit node. Due to the secure nature of the TOR ecosystem, there is little we can do to trace this matter further. Additionally, we have taken additional steps to ensure that no logs are available on our servers. Please note that we believe in complete transparency; therefore, the initial request, our response, and any future communications will be listed on our *warrant canary* page.
